Contents Volume 71

Preface xi

Inventory investment over the business cycle in the EU and the US
S.P. Dimelis 1

The behavior of manufacturers' inventories: Evidence from US industry level data
B.R. Humphreys 9

Food inventory policies under liberalized trade
S. Jha and P.V. Srinivasan 21

Can inventory chaos be welfare improving
A. Matsumoto 31

Multiple regimes in the US inventory time-series: A disaggregate analysis
A. Stern 45

The speed of adjustment and production smoothing: Bayesian estimation
K. Surekha and M. Ghali 55

Structural reforms and inventory management: Evidence from Indian industries
A.M. Swaminathan 67

Inventories, financial structure and market structure
J.A. Tribó 79

Controlled partial shipments in two-echelon supply chain networks: A simulation study
S. Banerjee, A. Banerjee, J. Burton and W. Bistline 91

Production planning in Japan: Rediscovering lost experiences or new insights?
J. de Haan, M. Yamamoto and G. Lovink 101

The impact of inventory and flow planning parameters on supply chain performance: An exploratory study
R. Ganeshan, T. Boone and A.J. Stenger 111

Managing inventories in the machine building industry: Results from empirically driven simulations
E. Hałas and M. Fertsch 119

Maintenance spare parts logistics: Special characteristics and strategic choices
J. Huiskonen 125

Economic lot sizing with learning and continuous time discounting: Is it significant?
M.Y. Jaber and M. Bonney 135

An analytic approach to supply chain development
J. Korpela, A. Lehmusvaara and M. Tuominen 145

Bar-code technology for inventory and marketing management systems: A model for its development and implementation
V. Manthou and M. Vlachopoulou 157

Time to build and aggregate work-in-progress
A. Milne and A.E. Whalley 165

Spare parts management at complex technology-based organizations: An agenda for research
W.D. Rustenburg, G.J. van Houtum and W.H.M. Zijm 177

PII: S0925-5273(01)00154-2

Linkages among manufacturing concepts, inventories, delivery service and competitiveness
G. Vastag and F. Montabon 195

Geographic information systems in warehouse site selection decisions
M. Vlachopoulou, G. Silleos and V. Manthou 205

Replenishment and pricing policy for deteriorating items taking into account the time-value of money
H.-M. Wee and S.-T. Law 213

Multi-level approaches to demand management in complex environments: An analytical model
G. Zotteri and R. Verganti 221

Numerical computation of inventory policies, based on the EOQ/σ_x value for order-point systems
P. Alstrøm 235

Analysis of an inventory system under backorder correlated deterministic demand and geometric supply process
N.T. Argon, R. Güllü and N. Erkip 247

Scaling down multi-echelon inventory problems
S. Axsäter 255

Modeling of inventory control with regenerative processes
E.M. Bázsa, J.B.G. Frenk and P.W. den Iseger 263

Supply chain coordination in spatial games
M. Bogataj and L. Bogataj 277

Small random perturbations of just-in-time systems
E. Bulinskaya 287

Multi-product inventory and auxiliary allocation problem
S. Bylka and R. Rempała 295

Multiproduct lot sizing for finite production rate
S. Bylka and R. Rempała 305

Asset-selling problems with holding costs
I. David and O. Levi 317

Production strategies under environmental constraints: Continuous-time model with concave costs
I. Dobos 323

Discrete frequency models for inventory management – an introduction
D. Favaretto, R. Pesenti and W. Ukovich 331

Production economics and process quality: A Taguchi perspective
R. Ganeshan, S. Kulkarni and T. Boone 343

The origins of dynamic inventory modelling under uncertainty (the men, their work and connection with the Stanford Studies)
H.-J. Girlich and A. Chikán 351

Inventory policies for all-or-nothing demand processes
R.M. Hill and M.J. Dominey 365

On switching-type mixed-ordering policy based on monitoring forecasting error
K. Hoshino 373

Leadtime effects and policy improvement for stochastic inventory control with remanufacturing
K. Inderfurth and E. van der Laan 381

Pure and modified base-stock policies for the lost sales inventory system with negligible set-up costs and constant lead times
S.G. Johansen 391

Determining the size and location of suppliers for a minimum total distribution route problem
R. Kalfakakou and C.C. Tsouros 401

Stockout risk and order splitting
P. Kelle and P.A. Miller 407

Strategic safety stocks in reverse logistics supply chains
S. Minner 417

Simulation of supply chain behaviour and performance in an uncertain environment
D. Petrovic 429

Multicriteria ranking of inventory replenishment policies in the presence of uncertainty in customer demand
R. Petrovic and D. Petrovic 439

The reverse Wagner/Whitin model with variable manufacturing and remanufacturing cost
K. Richter and J. Weber 447
On the bias of intermittent demand estimates
A.A. Syntetos and J.E. Boylan 457
Project procurement and disposal decisions: An inventory management model
K.A. Willoughby 467
Diary of events 473
Author Index to Volume 71 477
Contents Volume 71 481
